Exhibition Plan

1

BioLAGO e.V. - the health network

As an international network BioLAGO links industry, science and healthcare for cooperation for innovation in Diagnostics, Devices, Drugs and Data.

THE PLANT KONSTANZ Investa Asset Services GmbH

THE PLANT is an innovation and business campus in Konstanz that provides flexible office, laboratory, production, logistics, and commercial spaces, complemented by modern infrastructure and a collaborative environment for companies ranging from startups to established enterprises.

2

BIOPRO Baden-Württemberg GmbH

BIOPRO supports the medical technology, biotechnology and pharmaceutical sectors in the healthcare industry in Baden-Württemberg.

3

Albstadt-Sigmaringen University

Albstadt-Sigmaringen University is a state university of applied sciences with competence in Life Science (diagnostics, biomedicine, pharmaceutical technology, hygiene, nutrition) Computing and Business Administration.

4

Novineon CRO GmbH

Novineon CRO GmbH is a specialised consulting and service provider, which supports manufacturers of medical devices and in vitro diagnostic medical devices (IVDs) in clinical and regulatory tasks relating to CE conformity.

5

InfectoGnostics Research Campus Jena, Reg. Assoc.

The InfectoGnostics Research Campus Jena unites more than 30 partners from science, medicine and industry are jointly developing novel solutions for diagnostics of infectious diseases.

6

AID Autoimmun Diagnostika GmbH

AID develops and produces in-vitro diagnostics & image analysis devices in the fields of microbiology, virology, immunology and human genetics.

Exhibition Plan

7

MIRA vision microscopy GmbH

MIRA Vision develops AI-powered pathology diagnostics, using fully synthetic medical image data to enable fast, accurate, and privacy-compliant disease detection without relying on real patient data.

8

Attomol GmbH

Attomol GmbH develops and supplies reagents for molecular and immunodiagnostics, combining molecular imaging with rapid precision thermal cycling through its Caledoscan platform to enable advanced analytical and diagnostic research applications.

ASKANIA Mikroskop Technik Rathenow

ASKANIA designs precision microscopes and optical systems for research and industry, providing customized solutions, expert support, and long-term service with a strong focus on innovation and quality.

9

BSI Group

BSI is a leading full scope EU Notified Body and UK Approved Body, with a deep understanding of the industry and the experience to review and assess your product's readiness for the market.

10

BBI Solutions

BBI Solutions develops and supplies high-quality reagents and related services to support in vitro diagnostics and life sciences teams in creating reliable, life-saving healthcare solutions.

11

LSCN GmbH

LSCN offers global multidisciplinary consultancy for the life science industry with expertise in e.g. fundraising, investor access, business development and market access.

12

Somco Software

Somco Software specializes in developing high-quality software for the medical sector incl. medical apps, serving clients across the EU and USA.

Exhibition Plan

13

Cormoran Biotech GmbH

Cormoran Biotech GmbH develops and manufactures high-performance PCR and molecular biology reagents, enzymes, and diagnostic solutions to support reliable research and molecular diagnostics workflows.

14

RICB DIAGNOSTICS AG

RICB Diagnostics AG is a Swiss medtech company developing advanced biosensor-based point-of-care diagnostic solutions that enable rapid, precise, and user-friendly detection of biomarkers directly from body fluids, bringing laboratory-quality testing closer to patients.

15

Biotechnet Switzerland

Biotechnet Switzerland is an association of Universities of Applied Sciences (UAS), universities, and research organizations. Industrial partners including small, medium and large enterprises can rely on proven expertise and outstanding infrastructure to support innovative R&D projects.

16

Universität
Zürich^{UZH}

Institut für Medizinische Mikrobiologie

University of Zurich - Institute for Medical Microbiology (IMM)

IMM offers laboratory diagnosis of infectious diseases, research and teaching.

17

Across Systems GmbH

Across Systems GmbH develops AI-powered translation management software that helps companies centralize, automate, and quality-assure multilingual content and localization processes while maintaining full control over workflows, terminology, and data security.

18

Colorcon

Colorcon is a global leader in the development of pharmaceutical excipients, film coating systems, and drug delivery technologies, supporting the design and production of high-quality medicines.

Exhibition Plan

19

YOOme
your medical experts

YOOme / BAYOONET Service GmbH & Co. KG

YOOme is a medical device development network, supporting manufacturers throughout the entire product lifecycle, from concept and design to software and hardware development, regulatory approval, market launch and post-market support.

20

DENZ BIO-Medical GmbH

DENZ BIO-Medical GmbH specializes in advanced microfluidic and diagnostic solutions, ranging from biosensors and organ-on-a-chip systems to customized point-of-care diagnostics. The company provides end-to-end support from R&D and prototyping to industrial-scale production.

21

Effectum Medical AG

Effectum Medical AG is a Swiss MedTech and IVD compliance partner that helps innovators bring products to market faster through regulatory affairs expertise, quality management systems, certification support, and legal manufacturer services.

22

Hahn-Schickard gGmbH

Hahn-Schickard is a leading applied research and development partner that transforms innovative ideas into market-ready products by leveraging microsystems technology, from concept development through to manufacturing.

23

medicalvalues GmbH

medicalvalues offers AI software to support doctors in medical diagnostics (laboratories, clinics, health care providers).

24

scienceOS UG

ScienceOS is an AI-powered research platform that helps scientists accelerate literature review, analyze millions of scientific papers and PDFs, organize research projects and generate insights from scientific data in a single workspace.
